IMPORTANT SAFETY RECALL

2007-2013 CX-9
Front Lower Control Arms Safety Recall 8515G

September 2015

This notice applies to your vehicle: VIN JM3TB38A990170626

Dear Mazda Owner:

This notice is sent to you in accordance with the requirements of the Canadian Motor Vehicle Safety Act.

Mazda Motor Corporation has decided that a defect which relates to motor vehicle safety exists in certain 2007-2013 CX-9 vehicles produced from October 24, 2006 through July 1, 2013.

If you are a recipient of this notice, your vehicle is included in this recall.

What is the problem?

On certain 2007-2013 CX-9 vehicles, it is possible that water may enter the front suspension lower arm ball joint fitting during driving. Driving on **salted roadways** during the winter months can lead to saltwater intruding into the ball joint, causing corrosion, which can result in generating looseness of the ball joint in the fitting. As a result of the looseness, a rattle may occur at the ball joint of the lower arm. **After extended operation** in such condition, the ball joint and lower arm may separate, causing a loss of steering control and increasing the risk of a crash.

What will Mazda do?

Replacement parts for this repair are not currently available. We are closely working with our suppliers to accelerate parts availability. When replacement parts are available, we will send you another notification informing you to have the control arms replaced, free of charge.

Glossary

[View Full Glossary](#)

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Lease

When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.
